Coffee Shop Data Analysis for the CEO

- CONTENT

1. Introduction
2. Data Systems
3. Analysis
4. Recommendations
5. Q&A

1. Introduction

- The CEO wants to grow the company's revenue and improve product performance. I am tasked to do diagnostics analysis of the 6 months historical data, in-order to understand the fluctuation in revenue.

Aim

- The aim of this project is to provide detailed insights from the historical data.

2. Data Systems

- **Project Planning**

-Miro for project planning (data inspection and analysis process)

-Canva for project planning (project timeline on Gantt Chart)

- **Data Processing**

-Databricks (SQL)

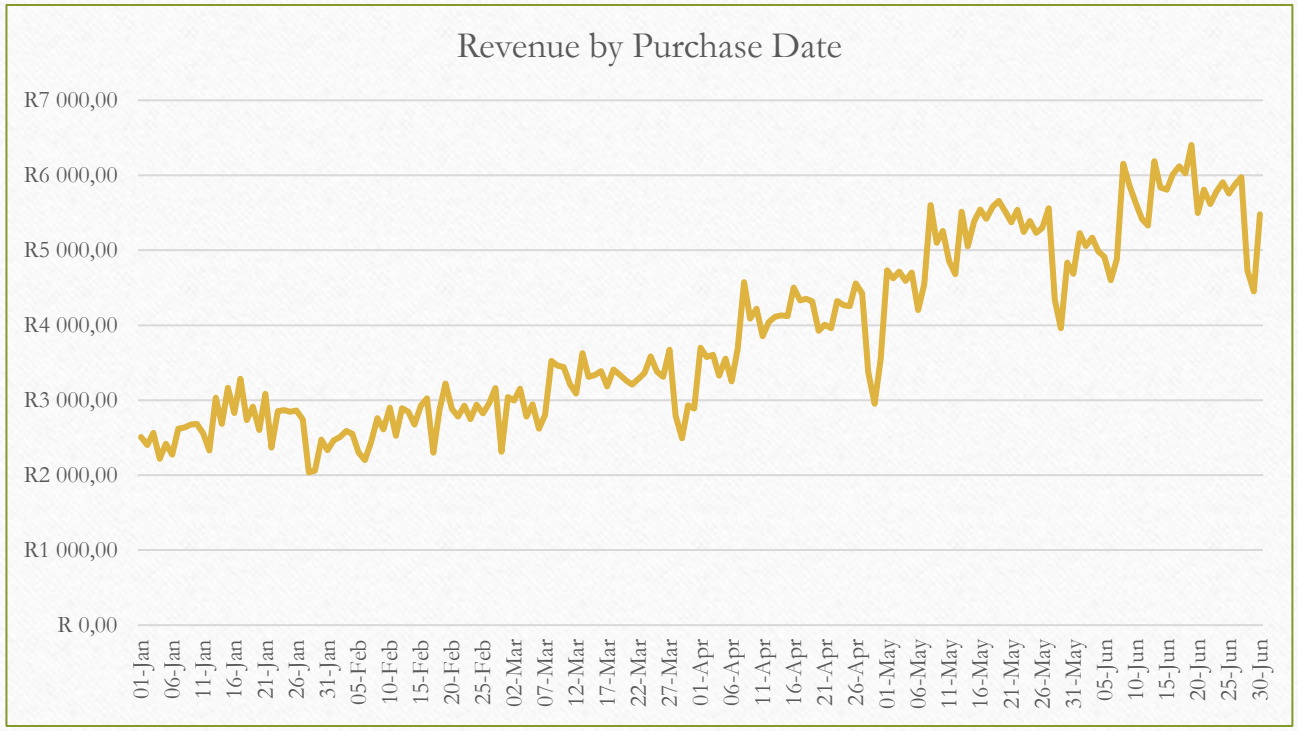
- **Data Visualisation**

-Microsoft Excel for data visualisation and dashboard creation

- **Presentation**

-Microsoft PowerPoint

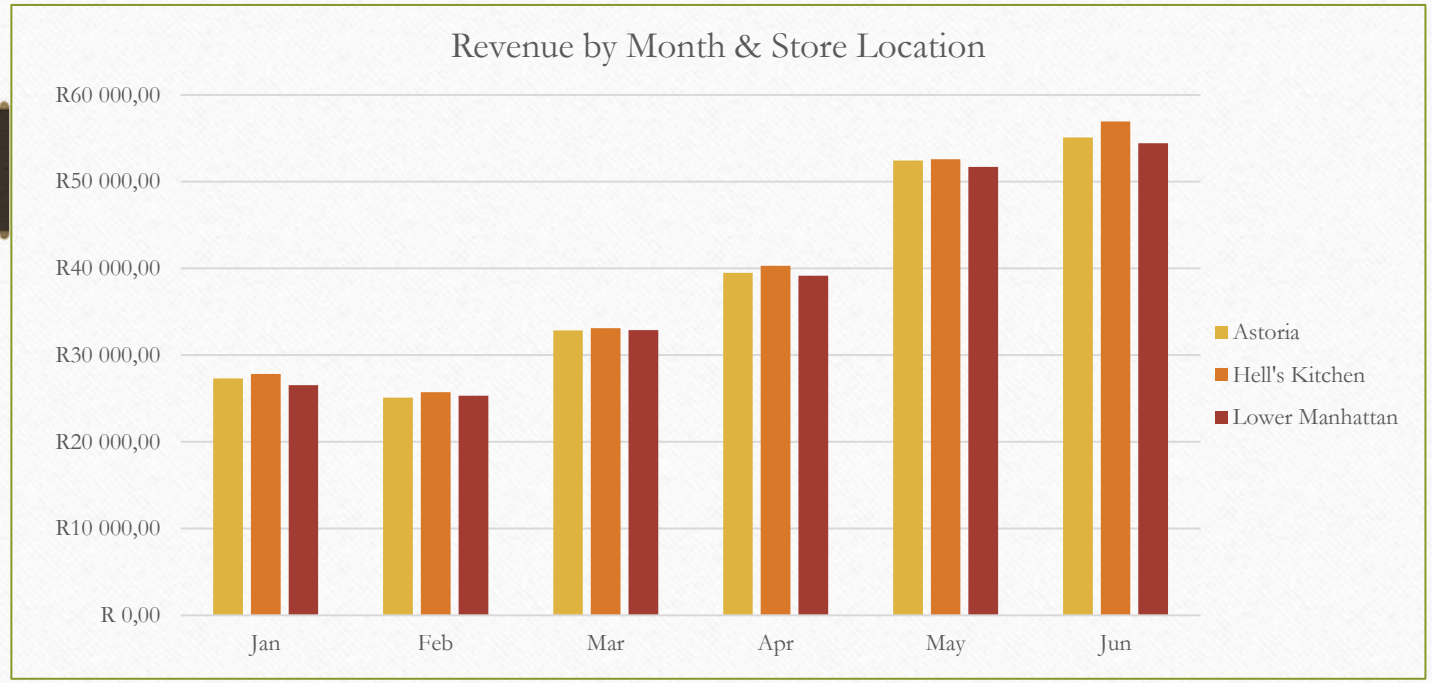
3. Analysis



Insights:

- The revenue increases from approximately R2300 in January, to approximately R6400 in June.
- This is a 50% increase in revenue over 6 months.
- The growth in sales starts from May and reaches the peak in Mid-June.
- This maybe a season change that is influencing the sales.
- The shop receives more customers in June.

3. Analysis



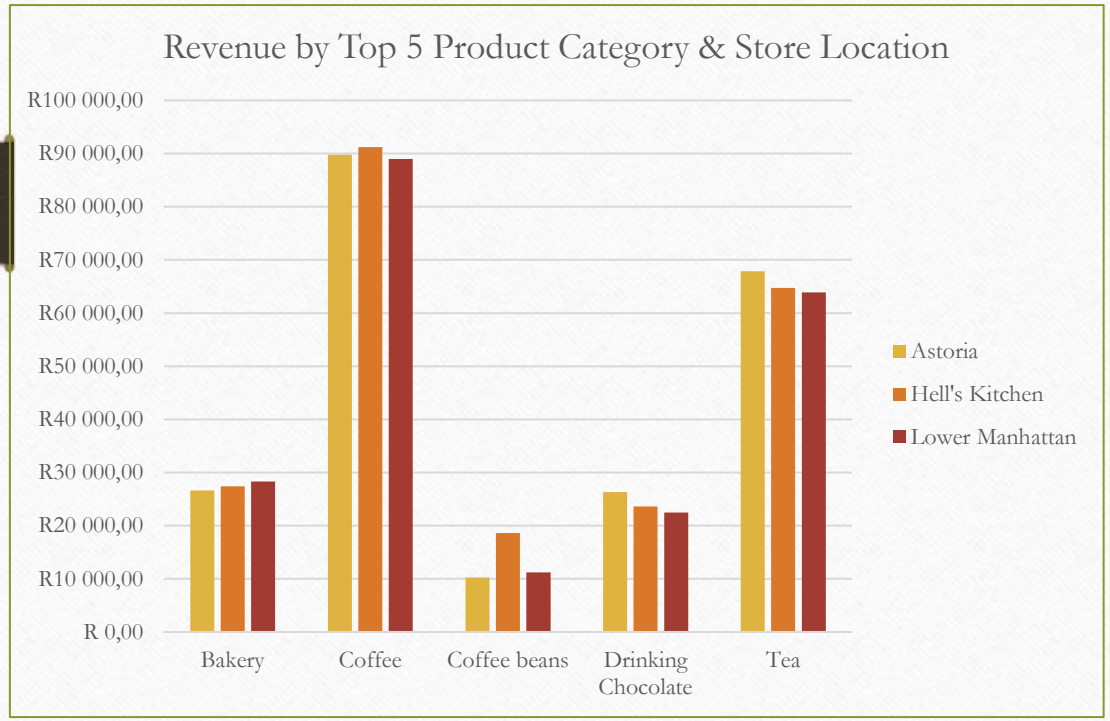
Insights:

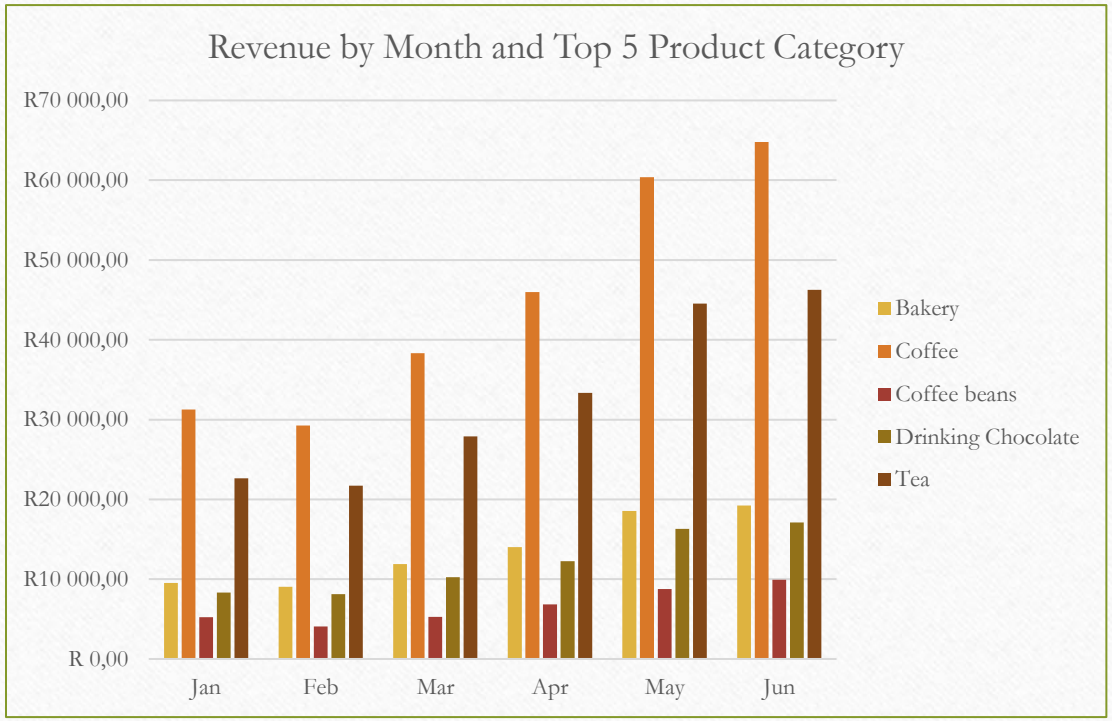
- The revenue increases in the month of June across all stores, as compared to January.
- Hell's Kitchen store generates the highest revenue across all months, compared to other 2 stores.
- Hell's Kitchen is the top performing store generating a revenue of (R56 957), followed by Astoria store (R55 083) and the lowest revenue is from Lower Manhattan store (R54 445).

3. Analysis

Insights: The top 5 selling products in all stores are Coffee, Tea, Bakery, Drinking chocolate and Coffee beans.

- Across all months and in all stores Coffee generates the highest revenue, followed by Tea in second place, however Coffee beans have the lowest revenue.

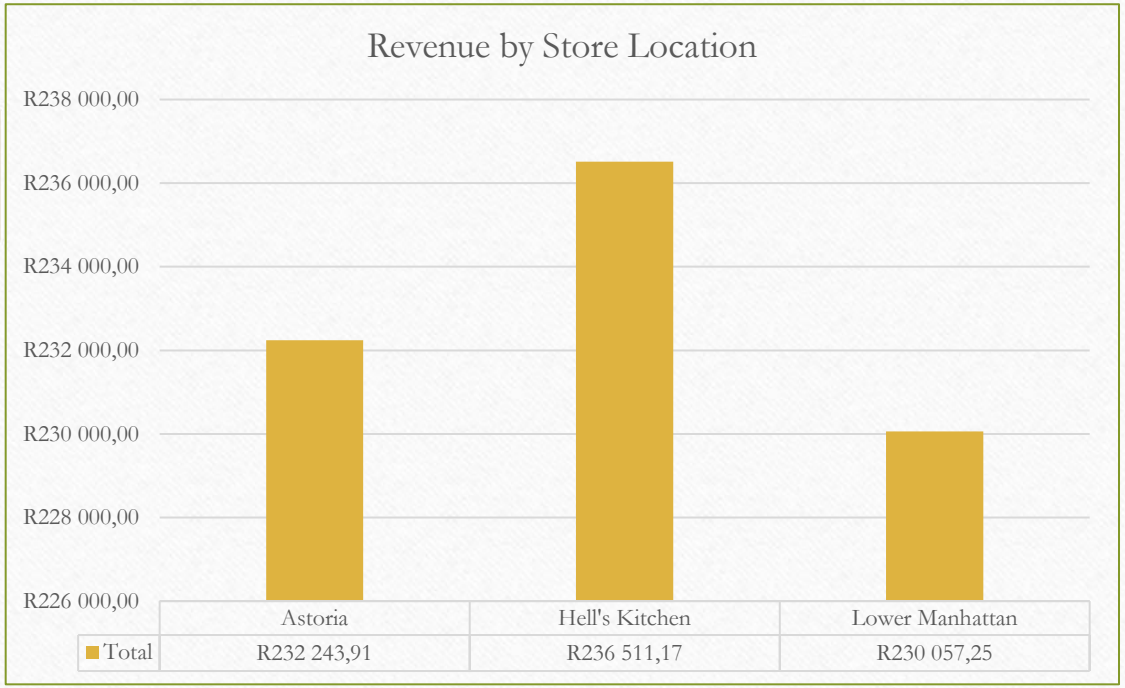


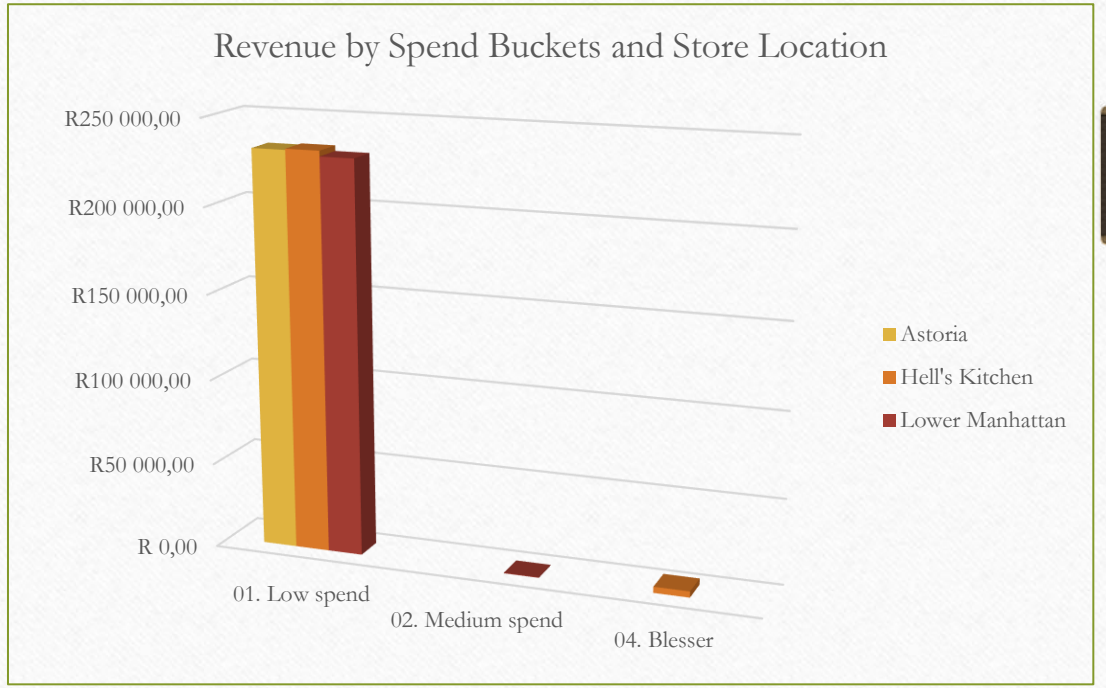


3. Analysis

Insights: Most of the revenue comes from Hell's Kitchen store and Lower Manhattan generates the lowest revenue.

- Low spend customers contribute 95% of the revenue in all stores, so most of the business's revenue depends on the low spend bucket.
- The bigger spend buckets (Blesser) contribute very little revenue observed only in Hell's Kitchen store.

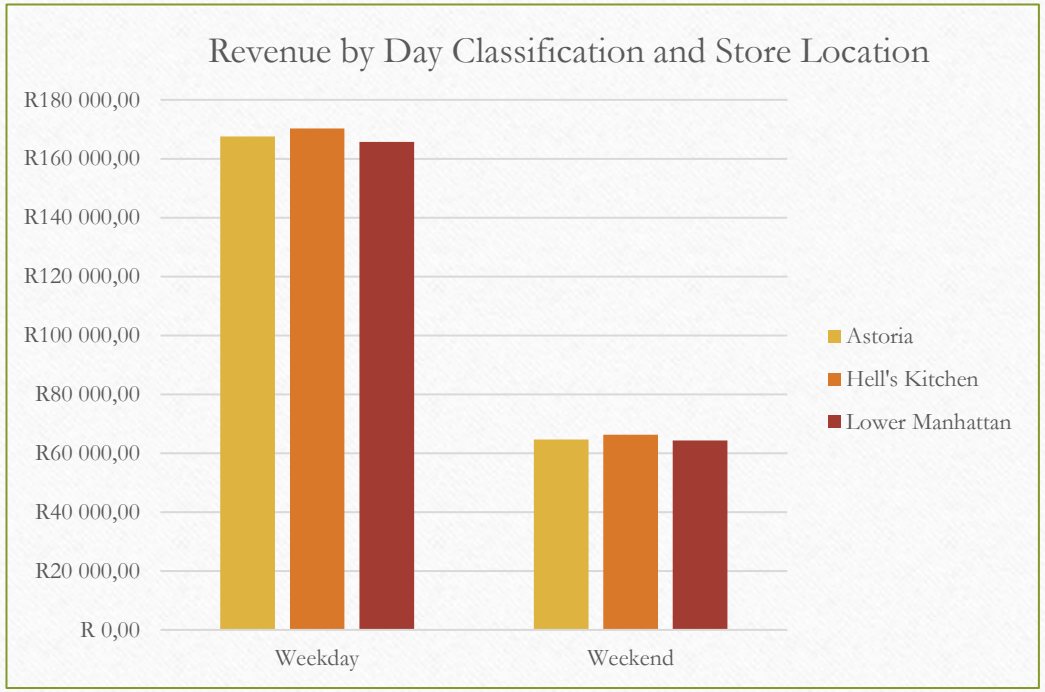


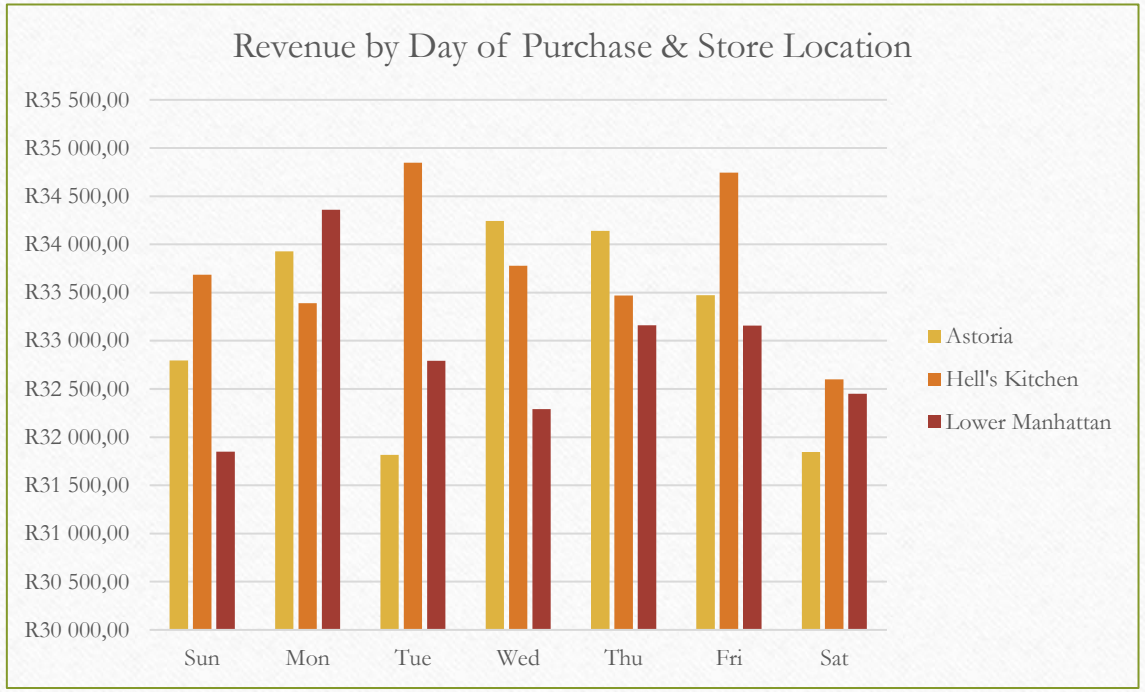


3. Analysis

Insights: Approximately 80% of the revenue in all stores is generated during the Weekday, maybe because people are going to work and school.

- Tuesday and Friday are the weekdays that have the highest revenue in Hell's Kitchen store.
- Monday, Wednesday and Thursday are weekdays that have high revenue in Astoria and Lower Manhattan stores.
- Weekends contribute less than half of the weekday's revenue.

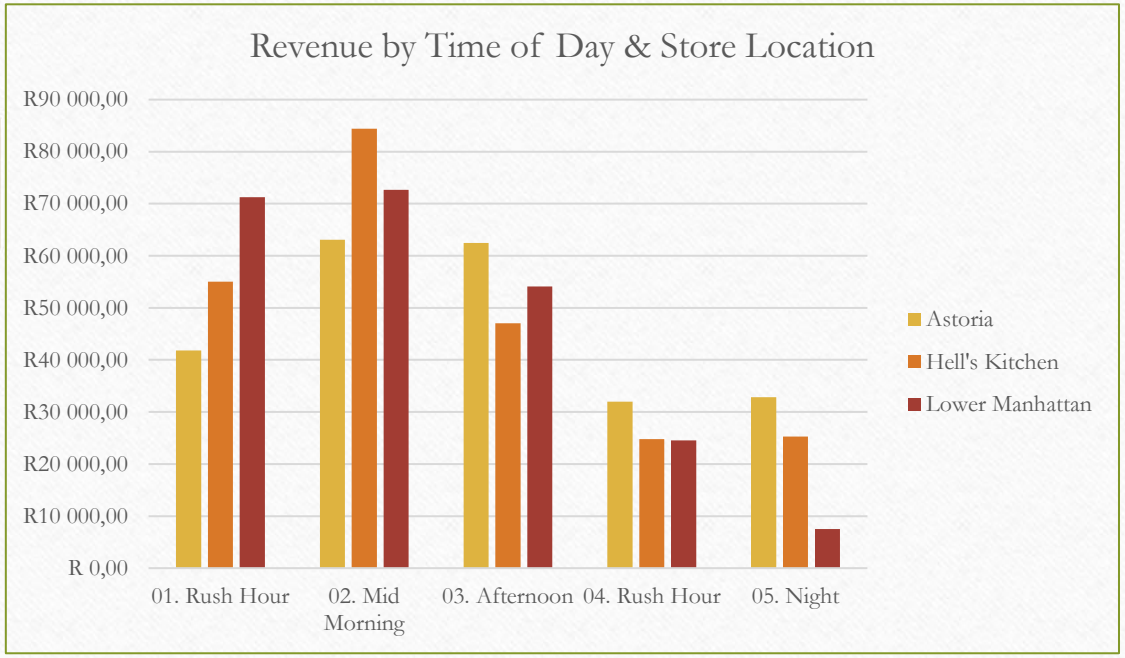


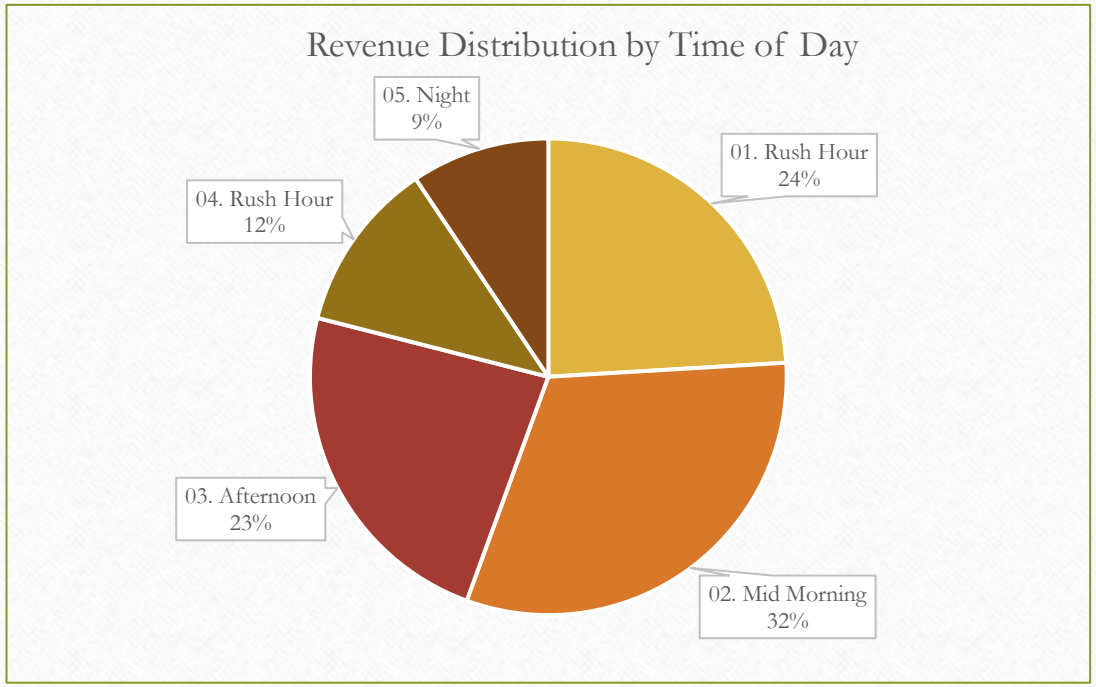


3. Analysis

Insights: Most revenue is generated during the Mid-Morning (32%), followed by 01.Rush Hour (24%) and Afternoon (23%), however the lowest revenue is in the Night (9%).

- Mid-Morning is the peak hour in all stores.
- Night is when most sales drop in all stores.





4. Recommendations

- Create loyalty or rewards programmes in high revenue generating stores like Hell's Kitchen
- Slight price increase for top selling products like Coffee and Tea in Hell's Kitchen.
- Create discounts in low revenue generating stores like Astoria and Lower Manhattan.
- To increase weekend revenue have weekend breakfast or lunch combos, family specials and buy 2 get 1 free on Saturday and Sunday only.
- Stock more of the top selling products in each store.
- Introduce combo deals at discounted prices, e.g. Coffee plus bakery combo, or Tea and Coffee beans combo (i.e. combine products with high revenue and products with low revenue).
- Create evening specials to improve night sales in all stores.
- Create afternoon specific combos to target lunch time and improve afternoon revenue in all store.

5. Q&A
